**Order Status Key:**

**Backordered** – product is available for order at this time; however, orders will not ship within 2 to 5 business days from order date. Please see notes for estimated shipping time.

**Unavailable for Order** – product is unavailable for order at this time.

\*Subject to customer office hours. Private direct orders only. Merck reserves the right to adjust shipping delivery times.

\*\*Adequate supply exists for MMR® II (Measles, Mumps, and Rubella Virus Vaccine Live) and VARIVAX® (Varicella Virus Vaccine Live)

**Monovalent vaccines no longer available for measles, mumps, rubella -**

Based on input from the Advisory Committee on Immunization Practices (ACIP), professional societies, scientific leaders, and customers, Merck has decided not to resume production of ATTENUVAX® (Measles Virus Vaccine Live), MUMPSVAX® (Mumps Virus Vaccine Live), and MERUVAX® II (Rubella Virus Vaccine Live). This science-based decision will support vaccination of the largest group of appropriate individuals. Merck will continue to focus necessary resources to ensure that they can help meet current and future global public health needs for their combination measles, mumps and rubella vaccine, M-M-R® II (Measles, Mumps, and Rubella Virus Vaccine Live).
